OBJECTIVE

Dedicated Artificial Intelligence Engineer in training with a strong passion for finance and business. Motivated to apply analytical thinking, problem-solving, and technical skills to contribute to financial growth and innovation in the banking industry.

PROFESSIONAL EXPERIENCE

Private Piano Instructor, *Bradford Academy of Music* 03/2020 – 08/2023
Bradford, ON

- Provide tailored piano instruction to students of all ages, emphasizing fundamental skills in music theory and performance.
- Foster a supportive learning environment conducive to student growth and development.
- Possess all level diplomas in the Royal Conservatory of Music (RCM), demonstrating comprehensive expertise in piano performance and pedagogy, while providing tailored instruction to students of all ages.

Software Programmer - Internship, *Blueprint Software Systems* 01/2023 – 05/2023
Toronto, ON

- Developed web applications using HTML, CSS, and JavaScript, resulting in responsive and user-friendly interfaces that improved user engagement by 20%.
- Collaborated with a cross-functional team to design and implement backend features using Node.js and MongoDB, reducing data retrieval times by 30% and enhancing application performance.
- Created automated testing scripts in Python, achieving a 40% reduction in manual testing time and improving code reliability.
- Optimized existing codebases by refactoring and implementing efficient algorithms, leading to a 25% reduction in execution time and improved scalability.

PROJECTS

Task Management App, *Database Lead* 01/2024 – 04/2024

- Collaborated with a team of three developers to design and build a task management application, resulting in a 40% improvement in user productivity and task organization.
- Developed a responsive user interface using React, working with UI/UX designers to enhance user engagement by 30%.
- Implemented MongoDB for data storage, coordinating with backend developers to enable real-time data updates.

E-commerce Platform, *Software Designer* 01/2023 – 05/2023

- Built a full-stack e-commerce platform with product listings, user authentication, and a shopping cart, enabling a secure and seamless shopping experience.
- Integrated Stripe API for payment processing, improving transaction efficiency and maintaining data security for all user transactions.
- Conducted user testing and feedback sessions, achieving a 95% user satisfaction rate and identifying areas for future improvement.

Remote Patient Monitoring 09/2024 – 12/2024

- Designed a Remote Patient Monitoring System (RPMS) to enhance patient care through real-time data collection and proactive healthcare interventions.
- Focused on improving access to healthcare for remote and rural areas, while optimizing resource allocation in hospitals and clinics.
- Delivered a cost-effective digital health solution with a user friendly interface, secure data transmission, and comprehensive chronic illness management.

SKILLS

Skilled Programmer

Designed handful of programs/web pages using C#, C, Java, Python, Unix/Linux, Ubuntu, HTML, CSS, and Javascript

Advanced MS Office skills

Performed data analysis via Excel; Formatted reports in Word; Created complex presentations using PowerPoint

Exceptional Data Visualization skills Via SQL

Performed multiple case studies using mongoDB and mySQL

EDUCATION

Artificial Intelligence Engineering, *Centennial College* 09/2023 – 04/2026
Toronto

- Relevant coursework: Software Engineering, AI machine learning, Web Interface Design, Software Testing, IT Project Management, Strategic Business Ethics and Management
- GPA: 4.300
